DAYMARK SAFETY SYSTEMS

DayMark is more than a provider of quality foodservice safety products. We're a partner committed to meeting your food operation's unique needs with safety systems that work the way you do.

Our customers are at the center of everything we do. From procurement to food safety to the protection of your employees and facility - we deliver efficiency, quality, value and service that targets the needs of each member of your team. It's a customer-centric approach to business that shapes everything we do.

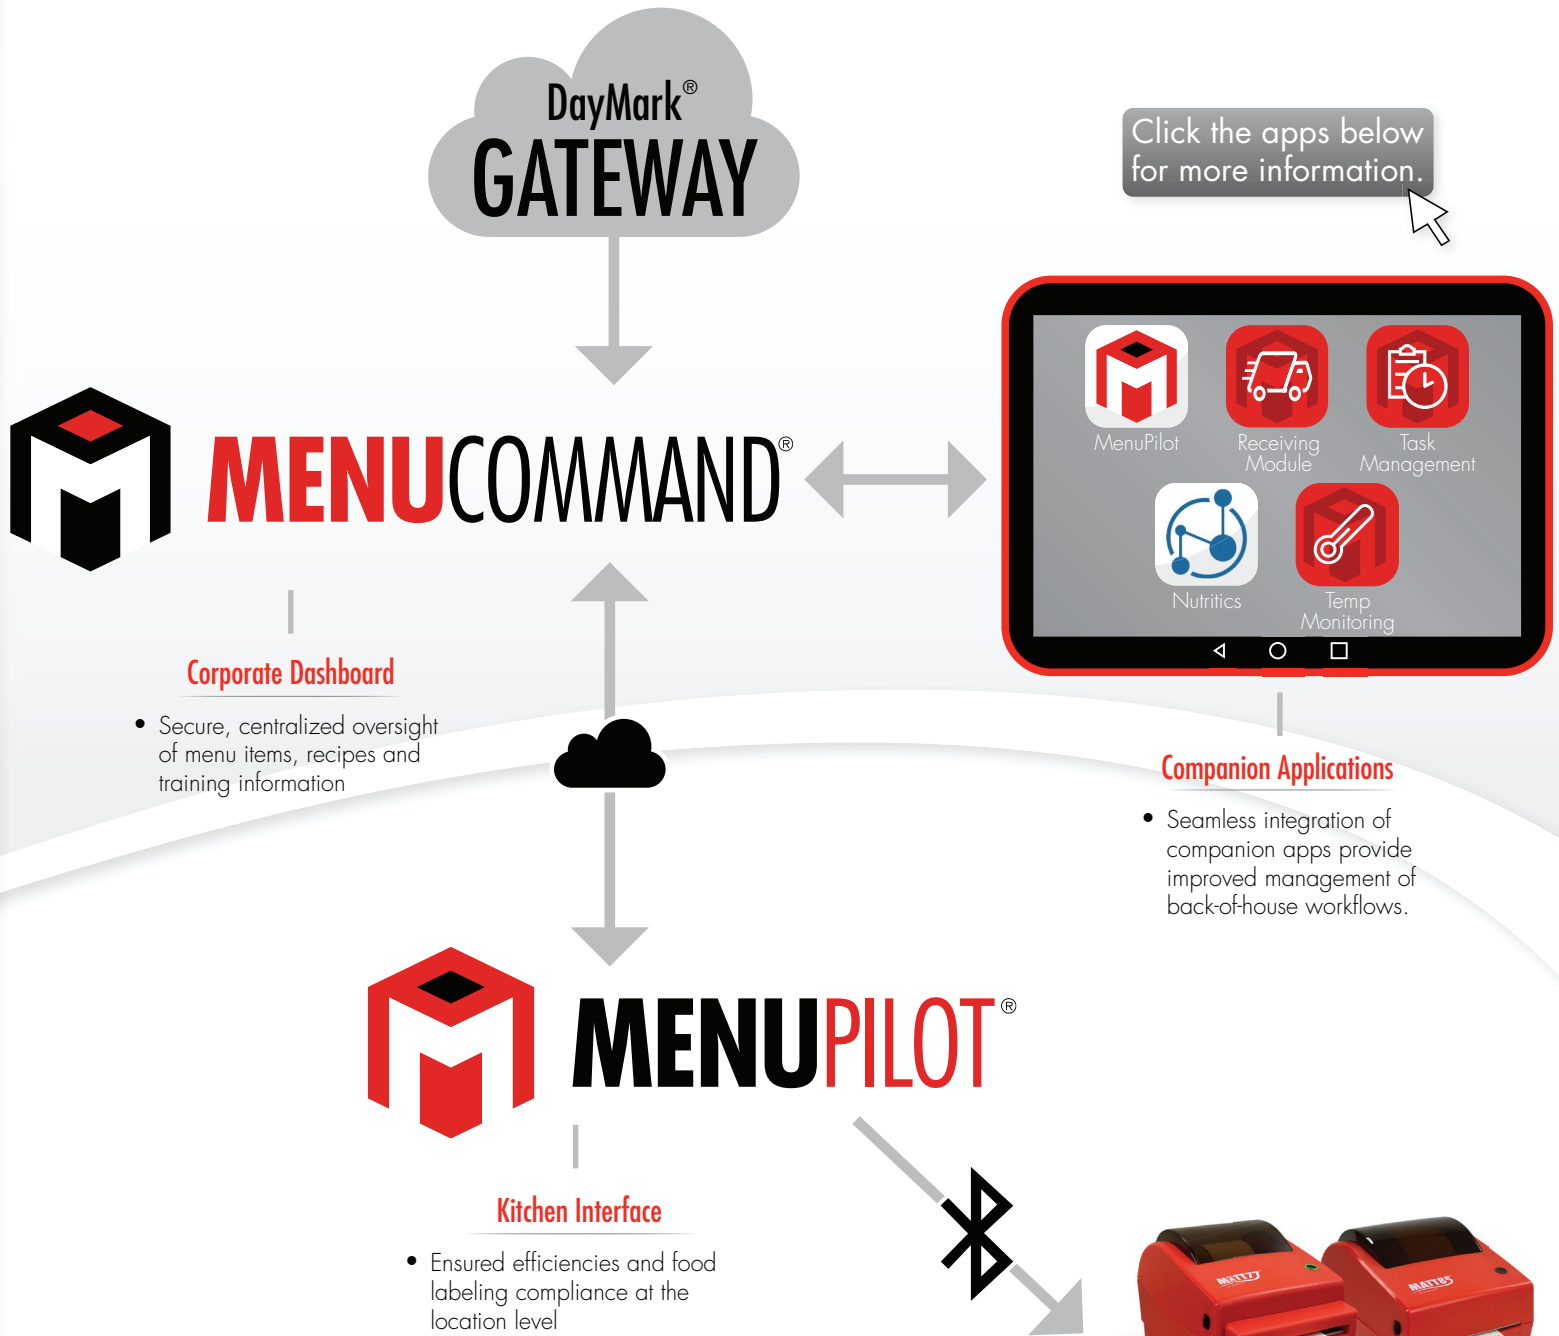

AUTOMATION FOR A BETTER, SAFER KITCHEN

DayMark® Safety Systems' proprietary, cloud-based and app-driven **kitchen automation platform** transforms how restaurants, retail foodservice, and non-commercial kitchens efficiently and safely prepare food for the public. It starts with DayMark's **totally secure, server-independent** digital distribution platform: the **GATEWAY**. DayMark's own cloud access GATEWAY hosts a number of innovative applications that DayMark has developed to **run your business better—and safer.**

MenuPilot®, the flagship application, coupled with streamlined corporate management of menu data via the **MenuCommand®** web portal, reduces dependence on hardware and increases emphasis on platform. These provide a deeper understanding and improved management of back-of-house workflows as well as overall food labeling compliance. DayMark also delivers a companion hardware bundle with the **Matt85™** or **Matt77™** direct thermal label printers, facilitating on-demand production of shelf-life, food rotation and complex grab & go product labeling.

How it Works...

Click the apps below for more information.

Corporate Dashboard

- Secure, centralized oversight of menu items, recipes and training information

Companion Applications

- Seamless integration of companion apps provide improved management of back-of-house workflows.

Kitchen Interface

- Ensured efficiencies and food labeling compliance at the location level

Complete Food Labeling System

IT118562	Wall Mount Bracket for Matt85 & Matt77 Printers

Companion Hardware

- Bluetooth-enabled direct thermal printers

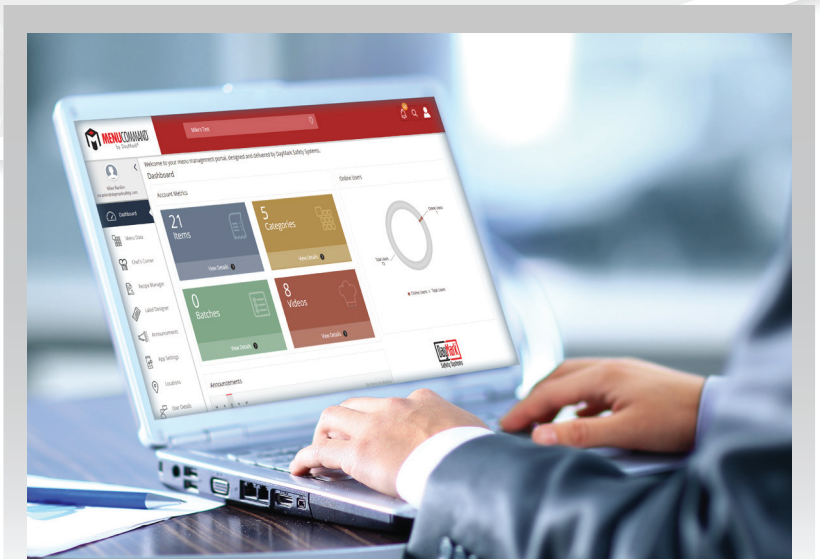

Automation for a Better, Safer Kitchen

MenuCommand® by DayMark® is the web-based portal that facilitates centralized management and communication of critical menu data, common tasks and training materials to foodservice locations near and far, utilizing intuitive applications for food labeling, task management and receiving, as well as temperature monitoring and food checks.

With a suite of kitchen applications and MenuCommand at the corporate level, foodservice operators will greatly reduce dependence on hardware while streamlining operations:

- **Greater Flexibility:** Accessible from any internet connection using Google Chrome, MenuCommand delivers extensive data storage and facilitates convenient task and menu management.
- **Enhanced Communication:** Shelf life, nutritional facts, allergen information and prep data can be organized, monitored and modified virtually anytime and anywhere, making MenuCommand ideal for managing food rotation, grab & go labeling, staff training and date code compliance from corporate headquarters to one or many foodservice locations. Likewise, MenuCommand also facilitates managing common tasks and receiving inventory from the corporate level to one or more locations.
- **Safety & Security:** MenuCommand is a secure, cloud-based portal. Automatic updates to the suite of software applications replace the need for mailed USB drives and download from FTP sites.

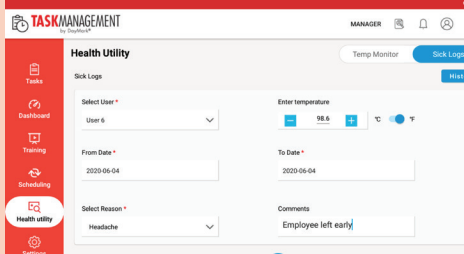

- Easy Menu Updates:** Machine and software updates have traditionally been clunky and inconvenient with early generation food safety labeling solutions. With MenuCommand, updates are securely and efficiently pulled in via the cloud to the  **MENUPILOT**[™] app at the store level.
- Streamlined Training Opportunities:** MenuCommand eliminates the need for time-consuming file conversions, recipe card file reformatting and large storage requirements. Upload video and recipe data at a central location and automatically share it with all connected store locations.
- Real-time Updates:** Data changes in MenuCommand that affect any of the apps can be communicated to staff at all locations immediately via a sync operation.
- Operations Redefined:** The  **TASKMANAGEMENT**[™] application allows food service managers to quickly and efficiently oversee task activity and the progress of ongoing operations in both the front- and back-of-house.
- Improved Receiving Management:** The  **RECEIVINGMODULE**[™] application gives food service operators the ability to track received shipments of goods, including non-conformances, short-ships and vendor performance.
- Temp Monitoring and Food Checks:** The  **TEMPMONITORING**[™] and Food Check Solution features robust hardware and user-friendly software that delivers food safety management, asset monitoring and HACCP compliance.
- Comprehensive Menu Management:** MenuCommand seamlessly integrates with the  **NUTRITICS** solution, DayMark's partner program that leverages a robust database of ingredients to quickly and easily build and manage recipes and menu data.
- Single-screen Oversight:** MenuCommand's user-friendly dashboard provides a comprehensive overview, including announcements, menu categories and items, label batches, training videos and number of users currently using the platform.
- Print Anytime, Anywhere:** The Bluetooth-enabled Matt85[™] & Matt77[™] label printers, delivered by DayMark as part of a complete automated food labeling program, allow users to print labels wirelessly using the MenuPilot app and the available Matt85 Android tablet.
- Goodbye Repair Costs:** The Matt85 & Matt77 printers are premium direct thermal printers, without premium pricing, which eliminates the need to make costly repairs and maintain labor-intensive repair depots.

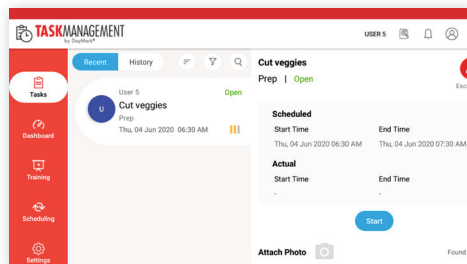

TASKMANAGEMENT by DayMark®

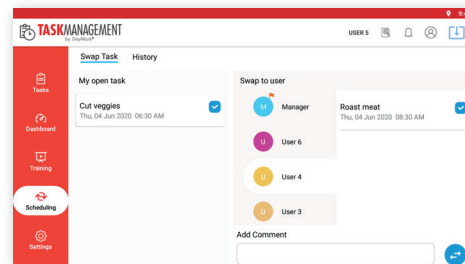

The new DayMark® Task Management application, available exclusively via the MenuCommand® Kitchen Automation Platform, allows food service managers to oversee task activity from a centralized location. The simple, user-friendly interface also gives staff the ability to document the progress of ongoing operations in both the front- and back-of-house quickly and efficiently with a variety of tools, including:

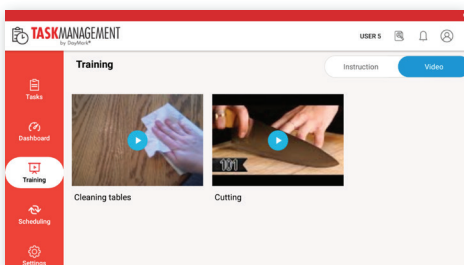

Stay Safe. Stay Open. COVID-19 Health Utility: Managers ensure the health and safety of staff by recording daily health details, including temperature measurements (both in Fahrenheit and Celsius) and a variety of symptoms employees may be experiencing. When staff members are designated as 'sick,' they cannot be assigned tasks until they are determined to be healthy.

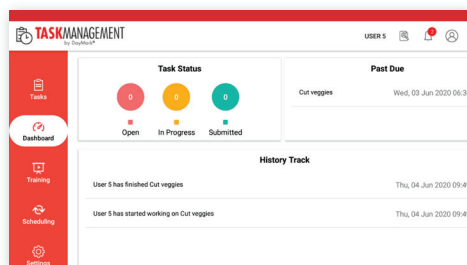

Streamlined Task Management: Assign, view, and track cleanings, food prep, equipment checks, and other kitchen tasks from start to completion. If a task cannot be completed, staff members can escalate it to a manager for resolution.

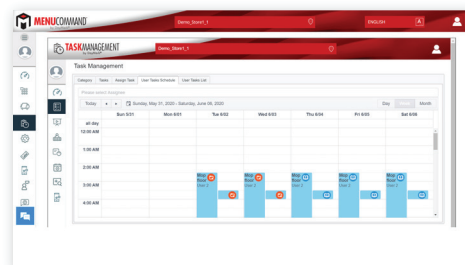

Flexible Scheduling: Managers can assign tasks—but staff members are also empowered to 'swap,' or exchange, tasks as needed based on availability and changing needs.

Training Section: Host training materials such as written procedures or video tutorials in one central location, giving staff a comprehensive resource for instruction.

Dashboard: Get a high-level overview of tasks, including current statuses, tasks that are past due and a running history feed showing task activity.

Manager View: Using the MenuCommand® web portal, managers can view task data, compare staff performances, maintain employee information and more.

Annual App Subscription

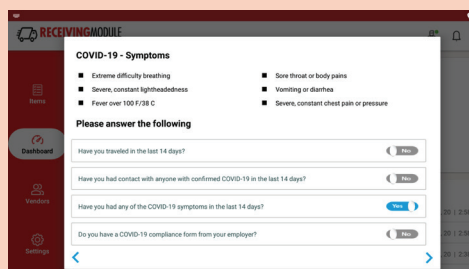

Task Management **IT1 19563**

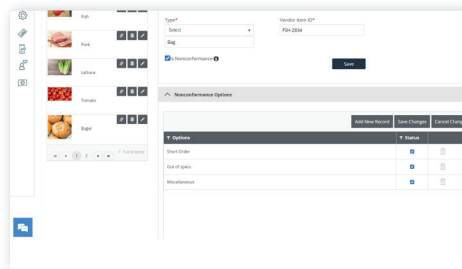

RECEIVINGMODULE by DayMark®

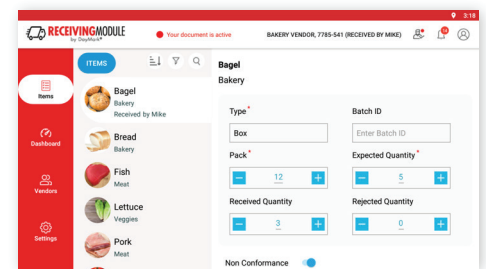

DayMark's new Receiving Module application, available exclusively via the MenuCommand® Kitchen Automation Platform, gives food service operators the ability to track received shipments of goods, including non-conformances, short-ships and vendor performance both at the store level and the corporate level. The Receiving Module features a convenient, easy-to-use interface and offers a variety of intuitive features, including:

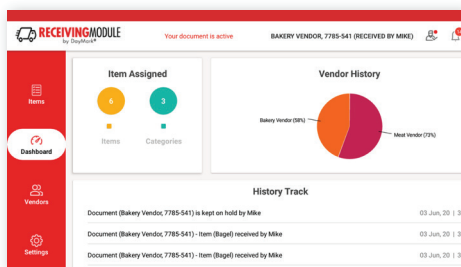

Stay Safe. Stay Open. COVID-19 Driver Compliance Test: One of the Receiving Module's most innovative features requires delivery drivers to answer a series of questions related to their risk of carrying the novel coronavirus/COVID-19. The shipment cannot be received until the test has been completed; if the driver cannot pass the test, the shipment can be rejected.

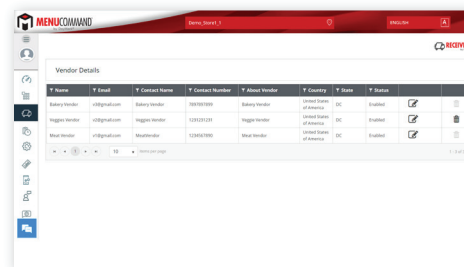

Custom Non-Conformances: Managers are able to create custom, item-specific non-conformances that identify and document orders that are short, out-of-spec, or otherwise incorrect.

Flexible Data Capture: Have you received a partial delivery, with the rest expected to arrive later in the week? Receivers can adjust expected shipment statuses and keep open deliveries on hold based on delays or other incomplete information.

Dashboard: Review the history of received shipments with a variety of charts that measure data related to vendors, items, and delivery times.

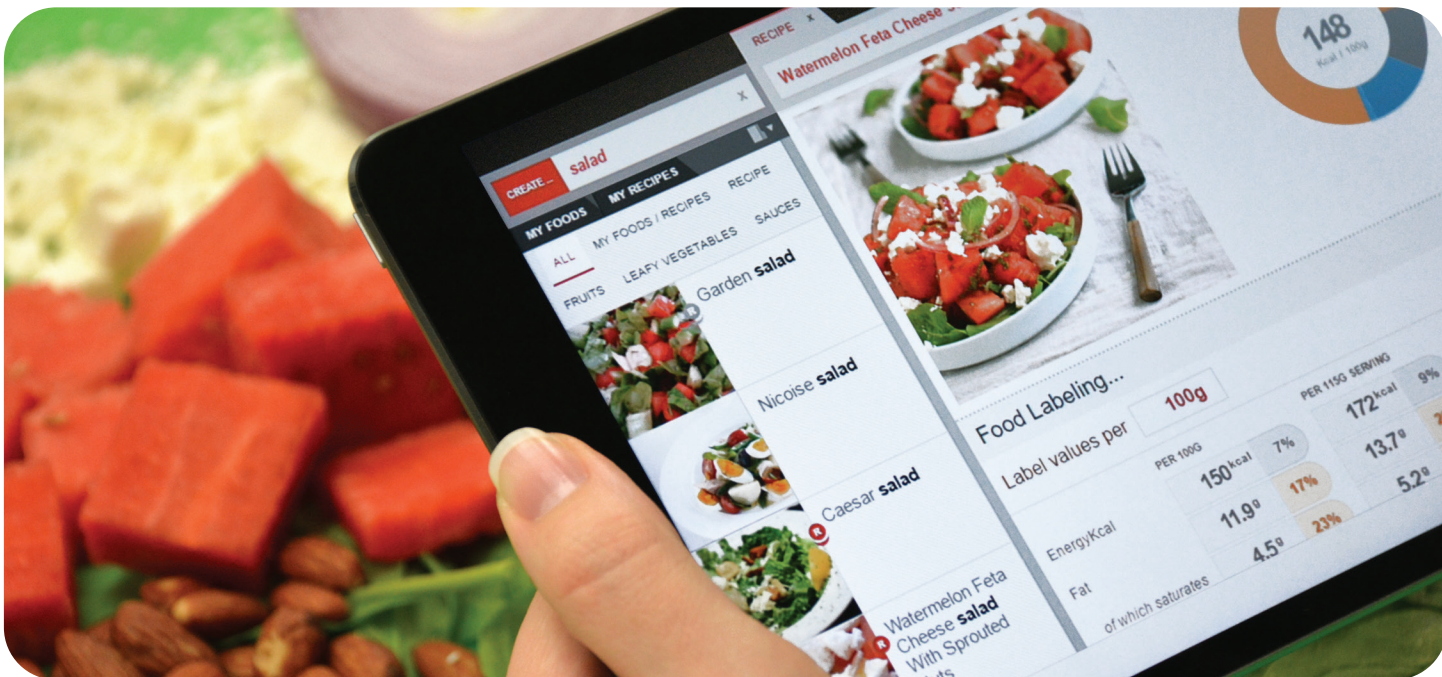

Manager View: Control which items are eligible for receiving, view receiving data, compare vendor performances, maintain vendor contact information and more from the MenuCommand® web portal.

Annual App Subscription

NUTRITICS INSIGHT

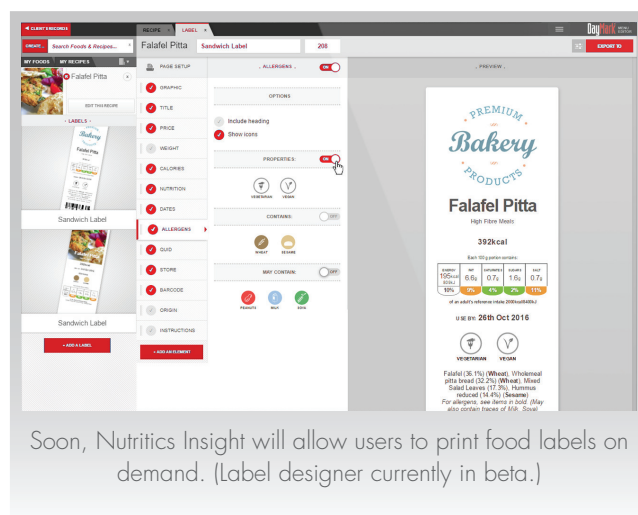

Conveniently Delivering Nutrition Analysis and Menu Management

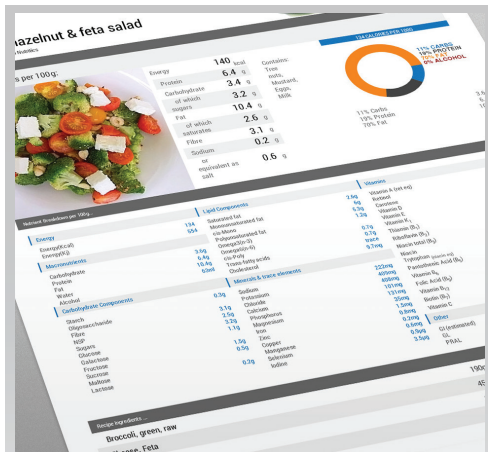

DayMark has partnered with Nutritics, a champion of software design and usability for the food service industry, to deliver an advanced, cloud-based program that leverages a robust database of ingredients to quickly and easily build and manage recipes and menu data within a unified system across a multi-unit organization.

The Nutritics Insight solution, available from DayMark, also offers the following:

- Menu cost analysis
- Regulation-ready nutrition facts
- Ability to collaborate with other users
- Support and training
- Supplier data imports
- Tracability and shelf-life tools
- Branded reports

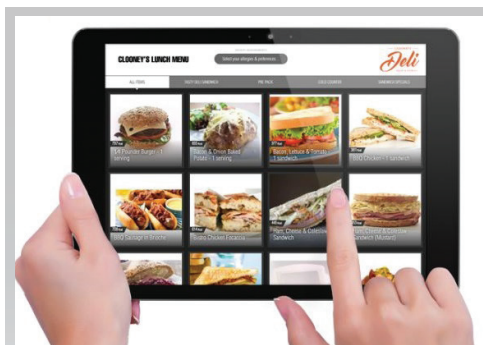

Nutritics provides nutrition analysis solutions to thousands of forward-thinking food service customers around the world, including Aramark, Starbucks, TGI Fridays and Radisson Hotels.

Massive Database: More than 125,000 data points and growing! Our expert dietic team continually adds user-requested foods and supplements to our proprietary, nutrition analysis program.

Secure Data: Encrypted servers and a regularly tested, comprehensive disaster recovery plan ensure your data remains safe and secure.

Front of House Digital Menu: Provide customers with a searchable digital menu of recipes, enabling them to make purchasing decisions based on allergens, calorie content and price.

THE DIFFERENCE IS FEATURES

- Centralized, Comprehensive Analysis Platform:** All your recipe analysis needs in one place. Analyze more than 60 individual nutrients including calories, sugar, salt, vitamins and glycemic index.
- Improved Efficiency Through Automated Processes:** Nutritics performs analysis in seconds and remembers your information to make it even easier to assess dishes and recipes.
- Boost Margins:** Get a detailed breakdown of your recipe costs, assess the cost-per-portion and view contribution of individual ingredients to total costs. These insights will reduce costs and increase your margins.
- Automatic Updates:** The program updates silently in the background, never disturbing your workflow. Receive database updates, feature enhancements and new food recommendations as they become available.
- We're Behind You:** Gain instant access to training and education for your team from our network of highly trained nutrition professionals.

TEMP MONITORING by DayMark®

DayMark's customizable temperature monitoring solution, powered by JRI®, features robust hardware and user-friendly software designed for diverse food service environments. The system is a reliable, HACCP-compliant solution that is easy to use, accurate, and saves food service operators time and money by eliminating the need for manual fridge and freezer temperature monitoring, food check monitoring, hand-recorded logs, and paper audits.

The DayMark temp monitoring solution delivers food safety management, asset monitoring and compliance through an intuitive and comprehensive web application. Its customizable modules offer extreme flexibility for the user, delivering efficiencies in a single site environment, an international enterprise and all stops in between. DayMark's temperature monitoring sensors, hot and cold food temperature probes, as well as user-friendly online dashboard and kitchen application offer 24/7 peace-of-mind and totally paper-free recording and logging of all required food safety data.

Now featuring LoRa technology!

The DayMark solution now utilizes the advanced LoRa technology, which further increases efficiencies and improves practices by allowing for longer-range communication between system components. The LoRa technology gives the system the ability to customize its frequency in order to best send messaging and avoid obstacles. This provides for more reliable results and the increased flexibility that larger-footprint operations need.

How does it work?

LoRa is especially useful in large-format locations that see heavy foot traffic and contain other obstacles and equipment scattered across the store. The lower frequency can travel further and send small bits of data at a longer range, allowing

Accessible Through  **MENUCOMMAND**
by DayMark®

Technical Features

Nano Sensor

- Measurement range: -40°F to 185°F
- Accuracy: $\pm .72^\circ\text{F}$ from -4°F to 104°F and $\pm .9^\circ\text{F}$ out of this range
- Operating conditions: -40°F to 185°F
- Standard calibration points: -.4°F/ 42.8°F/ 71.6°F

Type K Probe

- Measurement Range: -327.8°F to 701.6°F
- Accuracy: $\pm .72^\circ\text{F} \pm 1\%$ within the measurement range

What Does DayMark's Solution Mean for You?

- **Comprehensive Oversight:** DayMark's MySirius web application provides you with a bird's eye view at local, national or international levels in real time.
- **Modular Design:** Two customizable data modules can be tailored to suit your business needs. Pay only for the features you need.
- **Rock Solid Reliability:** Centralized data is continually backed-up and accessible from anywhere.
- **Customizable Reporting and Scoring:** The system feeds data back to you how and when you want it.
- **Secure Storage:** Safely store images to support documentation within the platform.
- **Peace of Mind:** Set text- or email-based, real-time alerts to notify you if a unit falls out of the parameters you define.
- **Time and Money Savings:** Our completely paperless system delivers efficiencies to your business.

- Simplify your operation's safety compliance
- Learn how to best utilize the products in your kitchen

THE DIFFERENCE IS SAVINGS

- Discover how much you can save with DayMark
- Realize positive effects on your bottom line
- Creative ways to increase your margins

THE DIFFERENCE IS SYNERGY

- Safety products that work well in combination
- Innovative foodservice safety suggestions
- Creative solutions for common kitchen problems

ToughMark™

Repositionable Adhesive

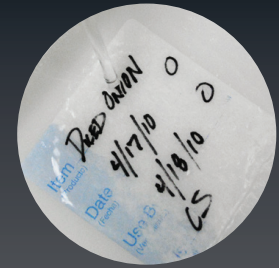

LABEL FEATURES:

- Repositionable adhesive is easy to remove and transferable
- Synthetic label face can be used in any environment
- Virtually tear-proof
- Working Temp -20° to 250° F
- Min Application Temp 25° F

DissolveMark™

Dissolve-A-Way™ Adhesive

LABEL FEATURES:

- Dissolves easily and completely in any water temperature
- Leaves no adhesive residue
- Dissolves in 30 seconds
- Perfect for reusable containers
- Working Temp -40° to 176° F
- Min Application Temp 21° F

MoveMark™

Removable Adhesive

LABEL FEATURES:

- Removes effortlessly from reusable containers
- Detach-Tab technology allows for three levels of adhesion
- Use in a variety of applications
- Working Temp -40° to 160° F
- Min Application Temp 10° F

RinseMark™

Wash-A-Way Adhesive

LABEL FEATURES:

- Labels remove easily from containers during the wash cycle, without leaving residue
- Labels are safe for the freezer
- Great for reusable containers
- Working Temp -40° to 176° F
- Min Application Temp 10° F

CoolMark™

Freezable Adhesive

LABEL FEATURES:

- Moisture-resistant and able to survive thawing process
- Aggressive adhesive is sure to stick to any surface
- Perfect for freezer applications
- Working Temp -40° to 160° F
- Min Application Temp 0° F

DURAMARK™

Permanent Adhesive

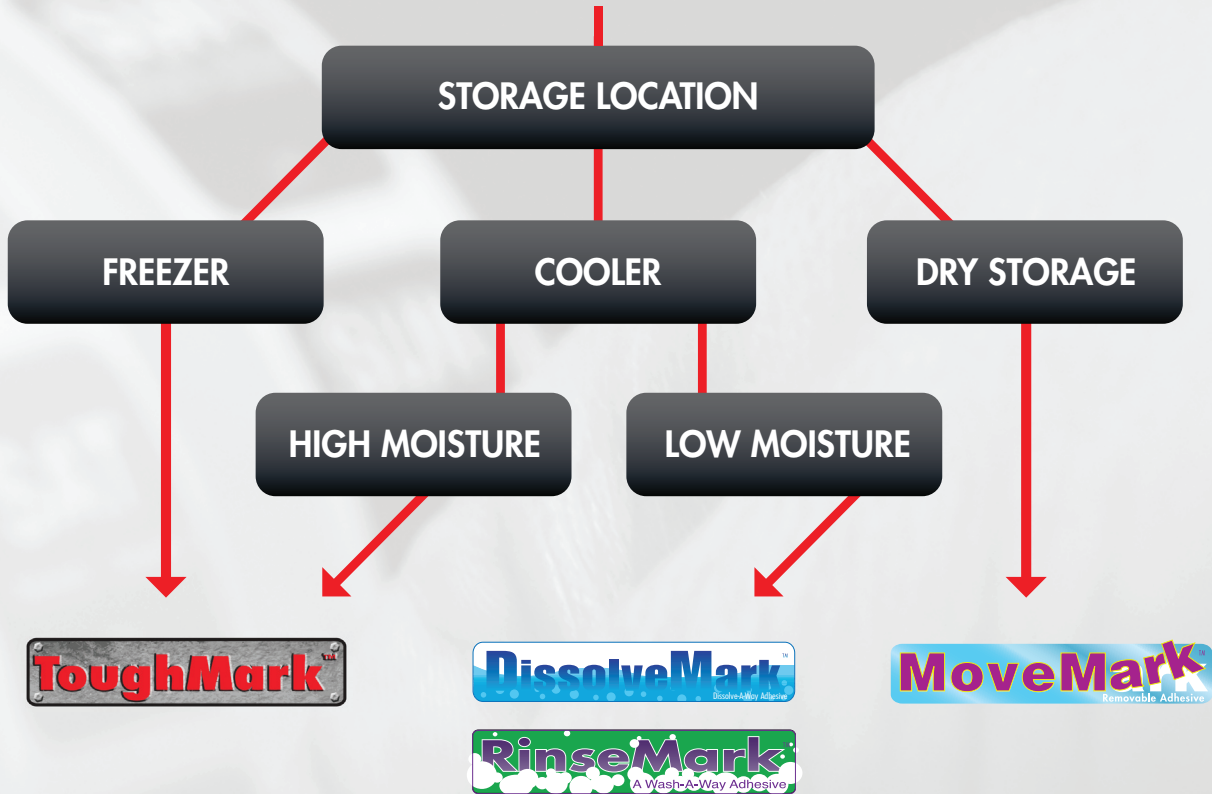

LABEL FEATURES:

- Aggressive adhesive works on any surface
- Ideal for disposable containers
- Available in a wide array of formats and layouts
- Working Temp -40° to 160° F
- Min Application Temp 10° F

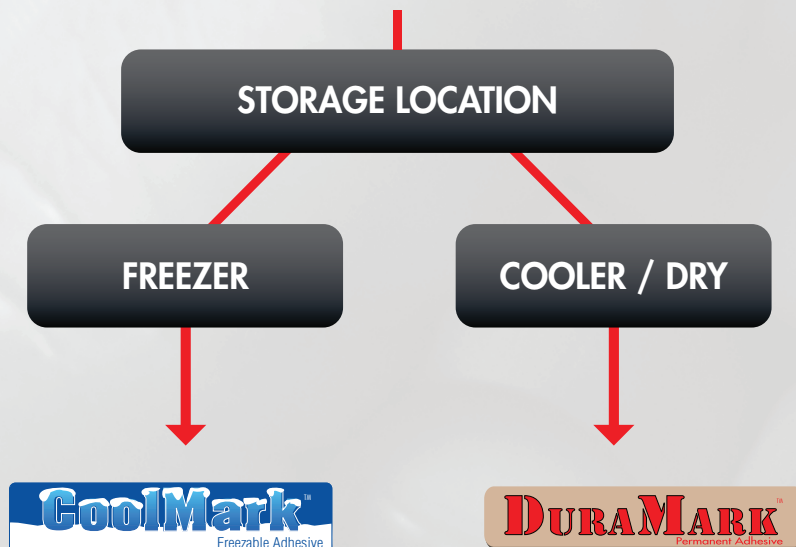

REUSABLE CONTAINERS

DISSOLVEMARK™

DayMark's Patented Direct Thermal Dissolve-A-Way™ technology out-performs any dissolving label on the market.

- Perfectly designed for use with the DayMark Matt85™
- Dissolves in any water temperature
- Leaves no adhesive residue
- Dissolves in 30 seconds or less
- Perfect for reusable containers
- Working Temp Range -40° to 176°F
- Minimum Application Temp 21°F
- More cost efficient and sanitary than the use of masking tape
- Permanent adhesive sticks to surface until washed away
- 12 month shelf life
- Reduces waste by printing labels as they are needed
- Saves valuable time by no longer having to hand write labels
- FDA compliant for indirect food contact
- FSC® Chain of Custody Certified
- Biodegradable

Pair with day label 110059

110208

THE DIFFERENCE IS SAVINGS

Over-portioning is a subtle but significant source of increasing food costs. Serving 1 extra scallop 30 times a day could cost your restaurant \$4,380 annually.

PIPINGAL® PASTRY BAGS

THE DIFFERENCE IS FEATURES

- PipingPal® Bags feature a level 1 tack
- No sanitation process required
- Anti-slip grip reduces hand fatigue
- Durable seams provide protection from bursting

PipingPal® disposable pastry bags deliver the strength and comfort of traditional canvas bags. With DayMark's highly durable, easy-grip design, PipingPal pastry bags deliver the confidence and control of reusable bags without the messy cleanup. No bursting. No risk of contamination due to improper cleaning. Simply dispose of the bag after use.

THE DIFFERENCE IS BENEFITS

HACCP regulations require thorough sanitization of traditional pastry bags. Reduce time spent sanitizing and increase overall productivity with our disposable pastry bags.

PIPINGAL® PLUS PASTRY BAGS

THE DIFFERENCE IS

FEATURES

- PipingPal® Plus pastry bags feature an easy to grip level 4 tack
- 78 microns thick and has a highly rated non burst strength
- Premier pastry bags are ideal for piping textured fillings
- Convenient 45° angle allows for fine detail work

4x the anti-slip grip

Featuring four times the grip of traditional disposable pastry bags, **PipingPal® Plus** pastry bags give you all of the benefits of the PipingPal bags—PLUS near-perfect grip, reducing hand fatigue. Both PipingPal and PipingPal Plus bags are strong enough for thick, textured fillings and feature a smooth interior that enhances product flow. The bags fit all tips and couplers, are sealed to prevent tampering, and are FDA compliant.

FIRST AID KITS

THE DIFFERENCE IS
FEATURES

- OSHA compliant with convenient refill programs available
- Specifically designed for the foodservice environment
- Contents tailored to common kitchen injuries; like cuts and burns
- Different models to fit your needs

SafetyApplied® Standard First Aid Kit

Size: 18" x 9" x 4.5"

Standard Kit **1131936**

Wall-mountable for ease of access, the SafetyApplied Standard First Aid Kit by DayMark, ideal for employee kitchens and breakrooms, features an innovative 'door-in-door' compartment that provides instant access to basic supplies for common cuts, abrasions and burns. The kit's internal compartments also feature theft-detering locking tabs and a built-in planogram, ensuring first aid supplies stay in place and properly organized. Convenient refill packages are available in seven bundles, each of which contains multiple items to reduce the hassle of maintaining individual SKUs.

FIRST AID KITS

SafetyApplied® Large First Aid Kit

Size: 18" x 14" x 4.5"

Large Kit **IT117598**

For establishments that employ up to 50 people, the SafetyApplied Large First Aid Kit by DayMark features a more robust inventory of items. Measuring 18" x 14" x 4.5", the large First Aid Kit maintains many of the features of the Standard Kit, including the "door-in-door" compartment for instant access to commonly used supplies for cuts, abrasions and burns; theft-detering locking tabs; and its ability to be wall mounted.

BODILY FLUID SPILL PROTECTION KITS

 THE DIFFERENCE IS
FEATURES

- Bodily fluid spill protection kit allows for easy and safe disposal of bio-hazardous material
- Mailback program provides easy disposal and proper documentation of spill clean-up

Steps:

1. Open absorbent powder pack and sprinkle enough powder to evenly cover body fluid incident.
2. Using scoop and scraper (and/or disposable towels), pick up solidified material and put into the red biohazard bag.
3. Thoroughly spray the approved cleaner/disinfectant over the spill area and allow for at least a 10 minute contact time.
4. Use disposable wiping cloth to clean all residual disinfectant.
5. Place used personal protective equipment (PPE) and waste into the red biohazard bag and tie shut.

BODILY FLUID SPILL PROTECTION KITS

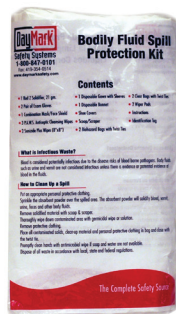

Refillable Bodily Fluid Spill Protection Kit 114707

Kits Include 2 Packs of:

- 1 Red Z® Solidifier, 21 gm.
- 1 Disposable Gown with Sleeves
- 2 Clear Bags with Twist Ties
- 2 Pair of Exam Gloves
- 1 Disposable Bonnet
- 2 Wiper Pads
- 1 Combination Mask/Face Shield
- 2 Shoe Covers
- 1 Identification Tag
- 3 P.A.W.S. Antiseptic Cleansing Wipes
- 1 Scoop/Scraper
- 2 Sanizide Plus® Wipes
- 2 Biohazard Bags with Twist Ties

Refills Available

SANITATION & CLEANING

14"x16" Microfiber Bar Towel

Virtually lint-free waffle-weave creates more efficient cleaning by providing greater surface contact; absorbs more than seven times its weight in liquid; part of a "Green Clean" system due to less water and chemical usage; synthetic fibers are resistant to bacteria growth; more durable than conventional bar towels – will last through hundreds of washings. Sold in packs of 12.

115069

Test Strips

An easy-to-use test kit to verify the strength of sanitizer solutions ensuring compliance with food safety laws.

QT-10 Test Strips – 15' roll
measures concentrations 0-100-200-300-400ppm
112808

QT-40 Test Strips – 15' roll
measures concentrations 0-150-200-400-500ppm
113827

Chlorine Test Strips – 15' roll
measures the concentration of free available chlorine in sanitizing solutions within the range of 10-200ppm
112589

FLOOR SAFETY

THE DIFFERENCE IS **FEATURES**

- Cushioning aids in reducing impact on joints
- Even weight distribution allows the foot to take a more natural position reducing pressure points
- Mats elevate employees for a safe and stable work environment

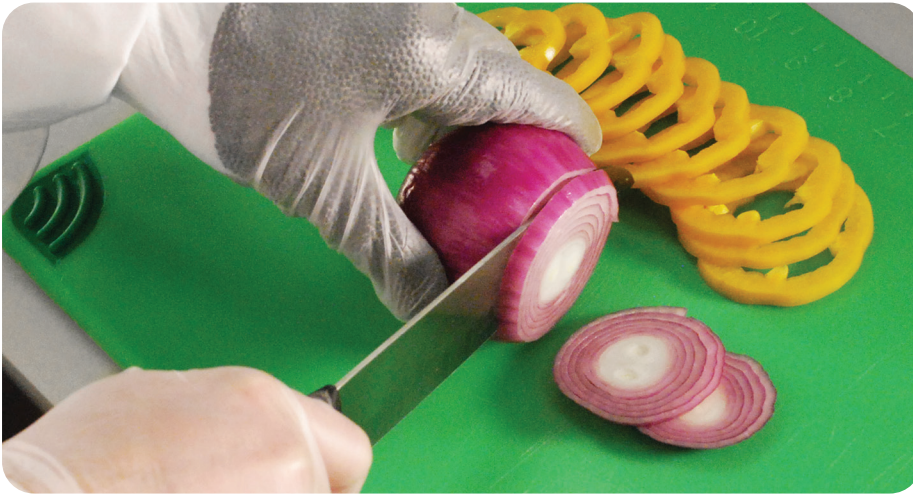

2' x 4' Alleviator Mat

The softest feeling, most comfortable anti-fatigue mat available. The double thick layer of foam offers three times as much "bounce" as traditional foam mats; the extra "bounce" stimulates muscles and blood flow to reduce fatigue. Use this mat if you have employees on their feet in one area for extended periods of time.

7/8" thick

114521

CUT PROTECTION GLOVES

THE DIFFERENCE IS
FEATURES

- Designed to significantly reduce the risk of cut injuries in the food service industry
- Comfortable and form-fitting, these safety gloves can be worn underneath standard disposable foodservice gloves to prevent cross-contamination
- Able to be sanitized in your dishwasher for added convenience

HexArmor® NXT 10-302 Cut Glove
